

TGWT salutes Cascades Containerboard Packaging - Cabano

## TGWT takes silver at Energia 2017 Competition

**Longueuil, May 31, 2017** - Did you know that the energy consumed by steam boilers stands for 40% of the total energy costs in the industrial and commercial sectors<sup>1</sup>? TGWT – The Tannin Guys® offers an environmental solution to reduce these costs. This technology won second place in the AQME (Quebec's Association for Energy Advancement) Energia 2017 Competition - in the Industrial or Manufacturing Process category with an energy bill of \$5 million or more per year. TGWT and its customer Cascades Containerboard Packaging – Cabano, had jointly submitted their application for this prestigious competition.

The energy, water and greenhouse gas savings achieved since 2011 at this plant exceeded \$900,000. "The Cascades Containerboard Packaging – Cabano team applies the best practices in the management of their boiler room, guided by their slogan, "Green by Nature". Éric Moreau, Boiler Room Manager, and our Senior Representative, Water & Energy, François Legault, are at the heart of the success of this project. No production shutdown was required and no CapEx." proudly mentioned Louis P Cloutier, President & CEO of TGWT.

Large steam users: agri-food, chemical, metallurgy, pulp and paper, lumber, textile, oil and oil sands industries, and large commercial and public buildings such as hospitals and high schools, colleges and universities, to name but a few.

### About TGWT

TGWT – The Tannin Guys®, engineers, manufactures and distributes purified tannins green chemistry for industrial steam boilers water treatment. Energy, water and greenhouse gas emissions reduction happen from day one for every user. TGWT is doing business in Canada, the USA and Mexico. Europe is covered by a strategic partnership with a German counterpart. For more information on TGWT's innovative technology and discover the power of purified tannins: <http://www.tgwt.com/>.
